Recommendation letter

To Whom It May Concern,

This letter serves to confirm that Ntobeko Hlongwa contributed to the Nelson Mandela Bay Municipality Proof of concept (PoC) in the capacity of Data Scientist. The primary objective of the PoC was to address long-standing challenges in billing and revenue collection, which have persisted for over two decades. This initiative involved ensuring data accuracy and proper formatting, as well as exploring how a Data Lakehouse can seamlessly integrate with a Data Warehouse without the need for multiple technologies.

Throughout the engagement, Ntobeko demonstrated exceptional technical proficiency, professionalism, and a deep understanding of core data-related competencies. His contributions were instrumental in several key areas, including:

1. **Data Preparation:** Effectively managed data sourcing, cleansing, and transformation to ensure high-quality, analysis-ready datasets.
2. **Database Management:** Utilized SQL to query tables within the Microsoft Fabric workspace and worked efficiently with relational databases as part of the broader data engineering process.
3. **Reporting and Visualization:** Developed clear and insightful descriptive reports and contributed to the creation of visual dashboards that effectively communicated analytical findings to stakeholders.
4. **Analytics and Modelling:** Applied statistical methods and basic modelling techniques to generate data-driven insights and deliverables throughout the PoC.

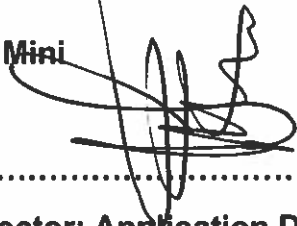

During the PoC, Ntobeko consistently demonstrated commitment, reliability, and the ability to learn and adapt quickly. I am pleased to confirm that the PoC was completed, with all key objectives met.

I strongly recommend Ntobeko for any future academic or professional opportunities. He possesses the knowledge, skills, and experience outlined above and would be an asset to any team or organization.

Should you require further information or wish to discuss his contributions in more detail, please do not hesitate to contact me.

Sincerely,

Siyabulela Mini
